Nationality: Pakistani | Availability: 1-2 Months

Professional Summary

Passionate and results-driven Unity Game Developer with over 5+ years of experience building cross-platform games for Android & Fire TV. Proven expertise in developing gameplay mechanics, optimizing performance, and integrating third-party SDKs using C# and Unity. Skilled in the full game development lifecycle, from prototyping to final deployment. Adept at working independently or within Agile teams to deliver polished, scalable, and engaging game experiences.

Core Competencies

- Gameplay Programming: Input systems, hitboxes, state machines, combat logic
- Unity Engine Expertise: MonoBehaviours, ScriptableObjects, Coroutines, Physics, Animation
- Mobile & TV Development: Android, Amazon Fire TV, input support (touch, remote)
- Level Logic & Undo Systems: Puzzle mechanics, procedural generation, undo/redo
- Performance Optimization: Memory, CPU, GPU profiling
- Third-Party Integration: AdMob, Unity Ads, Mediation SDKs
- Debugging & Testing: Runtime diagnostics, logs, breakpoints, Unity Console
- Workflow & Tools: Git, Agile methods, Unity Editor scripting

Professional Experience

Pugsde Solutions Pvt Ltd

Sr. Game Developer | Jan 2022 – Present

- Developed and maintained mobile game systems and plugins using Unity and C#
- Integrated AdMob, Unity Ads, and mediation plugins
- Improved game architecture using soft coding techniques for scalability
- Applied optimization strategies for performance on mobile and Fire TV
- Enhanced UI realism with GUI animations and particle systems
- Created engaging gameplay features using Unity's systems and shaders

Jr. Game Developer | Mar 2021 – Jan 2022

- Contributed to gameplay implementation and UI improvements
  Assisted in refactoring existing code for maintainability and performance

Intern Game Developer | Oct 2020 – Mar 2021

- Gained hands-on experience in Unity workflows and basic system implementation

---

Education

BS Computer Science | Comsats University Islamabad, Wah Campus – 2020

Relevant Courses: Data Structures & Algorithms, OOP, Game Theory, Digital Image Processing
Final Year Project: Localized Services Advertisement System (PHP, Laravel, JS, SQL)

HSSC (Pre-Engineering) | Sir Syed College, Wah Cantt – 2016

SSC (Science) | PBF International College, Islamabad – 2014
